Beste [REDACTED],

Buiten reikwijdte verzoek, ander onderwerp

[REDACTED] De beoordeling van ecotox moet nog. Hier zouden ook nog vragen uit kunnen volgen. Het is niet de bedoeling dat er al een antwoord wordt ingestuurd, dat kan pas na het versturen van de formele aanvullende vragen brief.

Deze vragen worden nu doorgestuurd om jullie vast de gelegenheid te geven om de antwoorden voor te bereiden.

Vragen:

Data point Question
efficacy

IIM 6.2.1 It is currently concluded in the phytotoxicity section that the use of product canâ€TMt be authorized in nursery crops, it should be restricted to production crops instead.

Please refer to section IIM 6.2.1

IIM 6.2.6 Only a short statement has been provided that assumes the product has similar risk to conventional products

The mild virus strains in the plant can however multiply in the plant and can infect new plants in ways similar to the aggressive strains. For the aggressive strains there are known issues in keeping greenhouses disease free between successive crops.

A more extensive justification for succeeding crops is needed that addresses this issue.

IIM 6.2.7 Only a short statement has been provided that assumes the product has similar risk to conventional products

The mild virus strains in the plant can multiply in the plant and can infect new plants in ways similar to the aggressive strains. In addition, the host range of Pepino Mosaic Virus includes plants other than tomato. A more extensive justification for adjacent crops is needed that addresses these issues.

Bijlage Part B7

Met vriendelijke groet,
