Subject: Conclusion data matching 1-methylcyclopropene PUH Chemirol 2020 Sept 10334 RMS Ctg-NL  
Date: vrijdag 11 september 2020 15:30:40

Dear MS interzonal contacts,

The data matching table for the active substance dossier of 1-methylcyclopropene for the following applicant has been finalised and has been uploaded onto CIRCABC on the 11<sup>th</sup> of September 2020:

Active substance	1-methylcyclopropene
Applicant	
Application reference code of RMS (if available)	10334 SD
Application date in RMS	1 July 2019
Direct link to the completed assessment uploaded to CIRCABC	
RMS conclusion	<b>All necessary studies are matched except for 5 vertebrate studies:</b> <b>Mammalian Toxicology: KCA 5.1.1./01, KCA 5.3.2/01, KCA 5.3.2/02, KCA 5.6.1/01.</b> <b>Ecotoxicology: KCA 8.1.1.1, KCA 8.1.2.2 (Study 8.1.2.2. is the same as study 5.3.2/01)</b> <b>The non-matched studies are vertebrate studies and duplicates are therefore not permitted (article 62 of (EU) 1107/2009). The applicant provided RMS Ctg-NL with sufficient evidence that the applicant is active in negotiations with the data owner of these studies. However, these negotiations have not yet led to a final agreement on data access between the parties involved. As data-access is a national issue, the RMS decided to declare the data matching list complete, except for the 5 vertebrate studies mentioned above. MS should individually judge a letter of access for these data or based on the evidence of commitment from the applicant decide to invoke access through article 62.4 for mandatory sharing of vertebrate data.</b>
Remarks:	The RMS for the active substance did not consider whether or not data protection applies to all studies for which data protection has been claimed. It is the responsibility of MSs to ensure that data protection standards as laid down in Regulation (EC) No 1107/2009 are respected. The RMS did not check whether valid Letters of Access were submitted. It is the responsibility of MSs to ensure that appropriate Letters of Access, valid for the respective MSs are available.

The data matching tables have been uploaded to circabc in the 'PLANT PROTECTION PRODUCTS AND THEIR RESIDUES' group in the active substance folder (Post Annex I - inclusion issues > Compliance check).

Yours sincerely,

Medewerker Informatievoorziening
