**Subject:** RE: resident exposure

Many thanks Luuk!

Is it ok for you / the Netherlands, to share this information with MS at the PAFF?

Kind regards

5.1.2.e Woo

**Subject:** resident exposure

Dear 5.1.2.e Woo,

Herewith I send you the links to the RIVM reports I mentioned this afternoon:

1. A report on exposure of residents, a solid report. It is in English: <https://www.rivm.nl/en/news/better-insight-into-local-residents-exposure-to-pesticides>
2. A health survey among residents not in the same league as above, but still interesting. One relation is to be noted: living in the vicinity of maize fields and lung-problems. Most probably not linked to pesticides but to the intensive animal husbandry, which is correlated with the cultivation of maize as feed for the animals. It is in Dutch but with an English summary.  
<https://www.rivm.nl/publicaties/gezondheidsverkenning-omwonenden-van-landbouwpercelen>
3. Our appreciation of the exposure report in light of the authorizations and in light of the current guidance to calculate the exposure of residents. In this document we also discuss a survey of residents living adjacent to fields where bulbs and lilies are grown. It is a citizen science approach but as such quite valuable. This document is in Dutch since it was meant for our minister and the Dutch parliament, but if you like we can send you a translation.
