## Notification according to art. 44(4) of Regulation (EC) No 1107/2009

Please note that the following authorisation has been withdrawn or amended in accordance with Article 44(4) of Regulation (EC) No 1107/2009

Member State	The Netherlands
Trade name of Plant Protection Product	Etna
Authorisation Number	13424 N
Use	herbicide
Names and contents of active substances	glyphosate 360 g/L
Type of formulation	SL
Authorisation holder	UPL Europe Ltd.
Application number (EU database) [not applicable yet]	not applicable yet
Action taken	Amendment of authorisation
Date of decision	November 11, 2016
Details of the decision	<p>The European Commission has decided by Commission Implementing Regulation (EU) 2016/1313 (d.d. 1 August 2016) that per August 22, 2016, plant protection products may not contain the co-formulant POE-tallowamine:</p> <p><i>'In the light of current scientific and technical knowledge it is appropriate to amend the conditions of use of the active substance in particular by excluding the co-formulant POE-</i></p>

	<i>tallowamine (CAS No 61791-26-2) from the use in plant protection products containing glyphosate.'</i>
Reasons for the decision	POE-tallowamine is more toxic compared to glyphosate. The NOAELs and LOAELs are lower (repeated dose toxicity, effects on fertility and developmental toxicity) and POE-tallowamine may cause DNA damage at high doses which are cytotoxic.
Notes	The authorisation holder was given the opportunity to submit comments. A grace period was granted that consisted of four months for sale which is subsequently followed by five months for use.

Please upload this document into the subfolder "notifications according to Art. ~~4436~~(43)" under the CIRCABC-folder of the upcoming Standing Committee meeting.

Naming convention: MS\_PP.doc (MS = ISO country code, PP = product trade name)
