1811-02	<p>Glyphosate renewal regulation (NL) (att. 1811-02)</p> <p>Interpretation of 'compliance of pre-harvest uses with good agricultural practices'. The EU renewal regulation for glyphosate states a particular attention point for Member States, that to our knowledge has not been used before for other active substances ((EU) 2017/2324 d.d. 12 December 2017):</p> <p>In this overall assessment, Member States shall pay particular attention to: [...] compliance of pre-harvest uses with good agricultural practices. A harmonized approach throughout the Central zone and preferably all zones would be preferred. All MS were asked to fill in the questionnaire.</p> <p>Updated version of the document provided by NL.</p> <p>NL included the feedback given by MS into the document and drafted a bullet point. Importantly, according to the restriction in the approval regulation to herbicide uses only, for glyphosate the use as a growth</p>

	<p>regulator is not allowed. NL tried to define the different possible uses and whether these are allowed or not. This is included in the bullet point. It is very important that MS handle the issue the same way since this is also a political issue.</p> <p><i>Tour de table: Do MS agree to the bullet point drafted by NL?</i></p> <p>5.1.2.a W00 can only reply after internal discussion.</p> <p>5.1.2.a W00 agree with the bullet point.</p> <p>5.1.2.a W00 cannot completely agree with the bullet point and will provide written comments to the bullet points after the TC.</p> <p>5.1.2.a W00 ask how to control the 10% of area - NL will get back to MS with info from their experts.</p> <p>Action: Provide written feedback regarding the draft bullet point on “Glyphosate renewal regulation” (all MS)</p> <p>Action: Provide a new draft bullet point on “Glyphosate renewal regulation” taking into account the comments by MS (NL)</p> <p><i>Sanitised minutes: not considered necessary</i></p>

<p>1903-03</p>	<p>Questionnaire Biodiversity and trophic interaction ^{S.1.2.3} (att.1903-03)</p> <p>^{S.1.2} ^{S.1.2.3.1} would be interested to know how environmental risk assessors and risk managers in the other MS of the central zone deal with the implementing regulation renewing the approval of the active substance glyphosate (EU 2017/2324 of 12 December 2017). For the first time for an active substance, explicitly requires all EU-Member States to pay particular attention to: "[...] the risk to diversity and abundance of non-target terrestrial arthropods and vertebrates via trophic interactions. Conditions of use shall include risk mitigation measures, where appropriate." MS are asked to fill in the questionnaire until 30.04.2019.</p> <p>^{S.1.2} mentions that there will be an additional document ^{S.1.2.3} (concept) attached to the questionnaire for information. MS will shortly receive the questionnaire together with this concept so that this can easily be forwarded to experts.</p> <p><i>Tour de table: Could MS give a give a preliminary answer?</i></p> <p>^{S.1.2.a} Woo cannot give a preliminary answer now and will reply to the questionnaire.</p> <p>NL report that there is no special assessment framework yet. The currently existing assessment framework is applied.</p> <p>^{S.1.2} have not investigated the trophic interactions yet. However, with no agreed GD the MS are not in position to do so.</p> <p><i>Sanitised minutes: not considered necessary</i></p>
