### **Glyphosate consultations: over 400 submissions collected**

The parallel consultations on glyphosate held by EFSA and ECHA closed on 22 November 2021.

During the two-month consultation, all interested parties had access to scientific evaluations prepared by the competent authorities of France, Hungary, The Netherlands and Sweden – the Assessment Group on Glyphosate (AGG).

A total of 416 submissions were received through the two consultations from within and outside the EU, the majority coming from Argentina. These submissions – some carrying multiple comments – are publicly available and can be found on EFSA's and ECHA's websites.
