

## Doorsturen besluiten ScoPAFF naar de NVWA a la Siltac

ii. Siltac (Question from 5.1.2.a)

This product is at the limit between products that only have sticking properties and those of which the mode of action is more invasive (suffocation). From the elements of the dossier (i.e. the molecular structure) it shows that the action is rather immobilisation (trapping) until death follows, than suffocation. As a consequence, this product is not considered a PPP, which is in line with other similar decisions taken in the past.

Dus geen PPP
