### A.13c NL comments to Scope questions – physical barriers

The Ctgb Servicedesk sometimes receives information from manufacturers that would like confirmation from Ctgb that they only have a physical mode of action and therefore do not need an authorization (a conformation which we do not give as this is not in our mandate).

Please find below some recent examples on products that claim a physical mode of action only:

- SECOVER / K-PAK (a silicon based spray comparable to Siltac)
