Subject: NL comments Siltac, K-PAK and STYX

Dear 5.1.2.e

Please find below our comments on Siltac, K-PAK and STYX:

We are still of the opinion that these products are PPP since they are sprayed on plants to kill insects. As we commented previously, we are aware that a change of interpretation has consequences for businesses putting these products on the market and thus that they need to be given sufficient time to prepare and submit the necessary applications. Therefore, a transition period that takes into account the time needed for those applications to be processed would be considered fair.

Please note we do not yet have a final position.

Best regards,

5.1.2.e
