Hoi 5.1.2.e

Hierbij nog de twee spreeklijnen voor SCoPAFF voor afstemming (in principe zal ik ze uitspreken). Graag je opmerkingen.

## TFA

Thank you for the opportunity to address this important matter.

In the SCoPAFF October meeting we discussed a comprehensive overview of active substances identified as potential TFA precursors. We kindly request an update from the Commission on the progress made in developing such an overview. [Mocht COM nog verduidelijking nodig hebben: Specifically, we are interested in the current status in the renewal process and any available data on TFA formation of the potential TFA precursors.]

Additionally, we would appreciate clarification on the Commission's perspective regarding the relevance of TFA and the subsequent steps Commission plans to take in this regard. In particular, we are keen to understand whether the Commission is considering initiating an Article 21 procedure for some or all of the identified potential TFA precursors.

[Mogelijk vraagt 5.1.2.a hier al naar, dan stellen wij de vraag niet, ik overleg wel even met 5.1.2.e voor de meeting, 5.1.2.e geeft aan dat het ook verstandig is om nog even met 5.1.2.e te spreken]

For action within our regulatory context, this needs to be done at EU level and we consider dedicated studies on TFA formation, utilising a consistent methodology would help generate robust data for all potential TFA precursors. Does the Commission consider it possible to explore an art 21 group approach —potentially involving coordinated efforts of an extended TFA industry consortium? This could provide a practical and efficient way forward to achieving the clarity needed.

We look forward to hearing the Commission's and other views on these points.

Buiten reikwijdte verzoek
